

## Recommended VMware LifeCycle Manager Desired Image Definitions for HPE Synergy

VMware LifeCycle Manager (vLCM) introduces the concept of a Desired Image, which is a precise description of OS release, software, drivers and firmware. The Desired Image is defined using a VMware Base Image, Vendor AddOn, Vendor Hardware Support Pack (HSP) and additional software/driver components. vLCM support of a Vendor HSP requires installation of a Vendor vLCM Hardware Support Manager (HSM) plug-in.

This document contains HPE recommendations to define the vLCM Desired Image for HPE Synergy Gen10 and newer servers running ESXi 7.0 or newer.

Information on HPE Synergy supported VMware ESXi OS releases, HPE ESXi Custom Images and HPE Synergy Service Packs is available at the OS Support tool for HPE Synergy:

- [https://support.hpe.com/docs/display/public/synergy-sw-release/OS\\_Support.html](https://support.hpe.com/docs/display/public/synergy-sw-release/OS_Support.html)

Overview information on HPE Synergy Software Releases is available at:

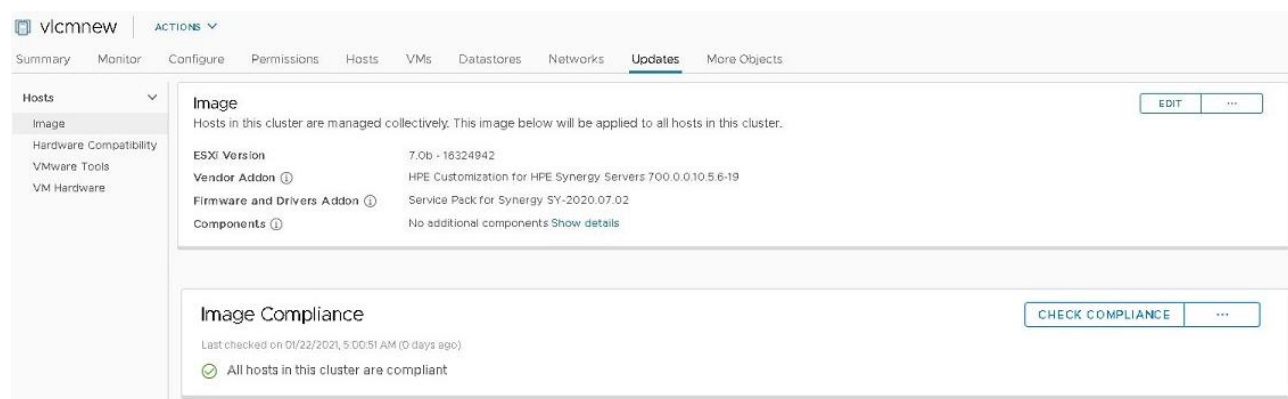

- <https://support.hpe.com/docs/display/public/synergy-sw-release/index.html>

HPE vLCM HSM plug-ins support the HPE Synergy Service Pack as the vLCM HSP.

vLCM support for the use of the HPE Synergy Service Pack requires installation of an HPE vLCM Hardware Support Manager (HSM) plug-in. See below for more information about the HPE vLCM HSM Plug-in:

- OneView HSM (OV4vC 10.1 or newer): [https://support.hpe.com/hpesc/public/docDisplay?docId=emr\\_na-a00118707en\\_us](https://support.hpe.com/hpesc/public/docDisplay?docId=emr_na-a00118707en_us)
  - OV4vC 10.1 and older is no longer available. Update to OneView HSM OV4vC 10.2 or newer. Refer to CA: [https://support.hpe.com/hpesc/public/docDisplay?docId=emr\\_na-a00130066en\\_us](https://support.hpe.com/hpesc/public/docDisplay?docId=emr_na-a00130066en_us)
  - SSP 2022.11.01 or newer requires OV4vC 11.1 or newer.

The picture below shows an example of the vLCM Desired Image definition using VMware ESXi 7.0, HPE Customization for Synergy Servers AddOn and HPE Synergy Service Pack.

The picture above uses the information in the first row of **Table 1** of this document.

HPE recommends the following combinations to define the vLCM Desired Image for HPE Synergy Gen10 and newer servers running ESXi 7.0 or newer for the VMware Base Image, the HPE AddOn and the HPE Synergy Service Pack. For more information on the VMware Base Images, see VMware KB <https://kb.vmware.com/s/article/2143832>.

The HPE AddOns are available from the VMware unified depot as well as the ESXi image download page at: <https://www.hpe.com/us/en/servers/hpe-esxi.html>

The HPE Synergy Service Packs are available at: <https://support.hpe.com/docs/display/public/synergy-sw-release/index.html>

NOTE: Updated patches and security builds can be installed from VMware. Installed updates will be reflected with a higher build number than the baseline build from the HPE Synergy-Only ESXi custom images. Patches are supported if they do not cross a VMware ESXi "update" boundary (i.e. 7.0 Update 2 does not become 7.0 Update 3) and do not install drivers that conflict with the HPE Synergy software release.

NOTE: Updated HPE AddOns and HPE SSPs are not required to update the VMware base image. For example, if VMware releases a Patch, the Patch can be installed directly without any changes to the HPE AddOn and SSP, provided the conditions in the previous paragraph are met. This is considered supported even if the Patch is not listed in the tables in this document.

a - For issues with VMware vCenter 7.0u1c release validating the HPE Synergy SPP for vLCM functionality due to a bad SSL handshake, VMware has released a KB article (<https://kb.vmware.com/s/article/83305>) which requires downloading an updated python module for vCenter.

b – Supports Gen10 servers, not Gen10 Plus.

a – This image is no longer available from VMware for download due to critical issues. For more information, please refer to the VMware KB article located at <https://kb.vmware.com/s/article/86398>.

b – This SSP is supported with HPE OneView for VMware vCenter (OV4vC) v. 11.1 or newer.

c - This HPE AddOn or HPE SSP has an updated ESXi 7.0 U3 lpfc driver that no longer supports the HPE Synergy 3530C 16G FC HBA. vLCM should not be used with these combinations and the 3530C FC HBA. Support is available using an HPE AddOn combination designated with footnote d.

d – This HPE AddOn is specifically for use in configurations containing the HPE Synergy 3530C 16G FC HBA. When this HPE AddOn is selected as a Vendor Addon, the HPE SSP must not be selected as a Firmware and Drivers Addon.
