Design of building and dwelling

stephane.ploix@grenoble-inp.fr

IV - Solution to consider during the design of dwellings

1. Low emission transportation accessible? can they park?
2. Are there energy source(s) nearby? local renewable energy production?
3. Re-use of materials, components,...? Heavy or light structure?
4. Bioclimatism or fitting into the environment
    1. solar radiation? natural solar protection ? passive or active solar protections?
    2. shape of the building?
    3. room usage and locations ...)?
